The Intra-Group Transactions Risk is one of the risks that must be managed in the implementation of integrated risk management. The Intra-Group Transactions Risk is the risk that arises from the dependency of an entity directly and indirectly on other entities in the Financial Conglomerate, so as to fulfill written and unwritten agreement obligations followed by and/or not followed by transfer of funds.

The Intra-Group Transactions can be in the form of financial or non-financial transactions conducted between companies in the Financial Conglomerate. In this case the companies said are Commonwealth Bank, PT Commonwealth Life (PTCL) and PT First State Investments Indonesia (FSII). The Intra-Group Transactions Risk in the Financial Conglomerate can arise, among others, from cross ownership, trading operations, short-term liquidity management, giving or receiving guarantee, loan and commitment, exposure to controlling shareholders, providing service, buying or selling assets, transfer of risk through re-insurance, transaction to transfer the risk of third party, as well as being a sales agent for product/service of other LJK to third party.

Proses Manajemen Risiko Transaksi Intra-Grup dimulai dengan mengidentifikasi komposisi transaksi intra grup dalam Konglomerasi Keuangan, dokumentasi dan kewajaran transaksi serta informasi lainnya. Selanjutnya, penilaian risiko transaksi intra grup dilakukan dengan mempertimbangkan kepatuhan transaksi intra grup yang dilakukan dengan prinsip-prinsip yang harus dipenuhi oleh setiap transaksi intra grup, risiko-risiko yang mungkin muncul dari transaksi tersebut, dampak yang mungkin terjadi, mitigasi yang telah atau akan dilakukan serta bagaimana arm's length principle dipatuhi untuk transaksi intra grup bersangkutan.

Pelaporan dilakukan melalui Satuan Kerja Manajemen Risiko Terintegrasi (SKMRT) Entitas Utama. Seluruh transaksi intra grup yang aktif dipantau oleh Satuan Kerja Manajemen Risiko dimasing-masing LJK. Apabila ditemukan indikasi ketidaksesuaian dengan prinsip-prinsip transaksi intra grup atau terdapat potensi risiko untuk anggota Konglomerasi Keuangan, dilaporkan ke SKMRT entitas utama. Transaksi intra grup dilaporkan kepada regulator sebagai bagian dari Laporan Profil Risiko Terintegrasi.

The management process of the Intra- Group Transaction Risk starts with identifying the composition of intra-group transactions in the Financial Conglomerate, documentation and fairness of transaction and other information. Moreover, the risk assessment of intra-group transactions is conducted by considering the compliance of intra-group transactions carried out with principles that must be met by each intra-group transaction, risks that may arise from the transaction, impacts that are likely to occur, mitigation that has been or will be carried out and how the arm's length principle is complied for intra-group transactions.

Every identified intra-group transaction is immediately reported to the Integrated Risk Management Committee (KMRT). Reporting is conducted through the Prime Entity Integrated Risk Management Work Unit (SKMRT). The Risk Management Unit in each LJK actively monitors all intra-group transactions. In the event of indications of non-compliance with the principles of intra-group transactions or potential risks for members of the Financial Conglomerate, such indications shall be reported to the Prime Entity's SKMRT. Intra-group transactions are reported to the regulator as a part of the Integrated Risk Profile Report.
